

The **10th** Annual International Youth Conference **2020**

Theme:

Skilling the Youth for Social Economic Transformation

Youth unemployment is increasingly becoming a big challenge among all nations. Entrepreneurship has been prescribed as solution. But Entrepreneurship without appropriate skills has been seen as insufficient to respond to the challenge of youth unemployment

Many African countries have taken on skilling as a solution. The Uganda Government has embarked on massive skilling effort to skill graduates and is also invested in technical institutions. I really loved the fun that we had. Then about getting to know new people and interacting with them so as to know our differences and also as a means of togetherness as family. It was really a good experience that I had in the last camp

Nabuguzi Jacinta

I liked the way we shared knowledge and ideas as individuals, made new friends and connections

Mulugwe Samuel

Thank you for this opportunity I extend my thanks to the committee for preparing such a camp because as a youth we have a lot of deviations and questions that hinder us from using our youthfulness to change the community through this camp I learnt how to package my self in society and overcome my fears in regards of communication with various people. Thank you so much I can now share my ideas with others because of this camp
